

Performance Indicators

Level 10 – Master

Lo studente può tranquillamente manipolare e usare il linguaggio sia per scopi scolastici che professionali. Lo studente sa con successo:

- prendere appunti mentre ascolta informazioni date in un contesto colloquiale e poi usarle per un compito mirato
- prendere appunti da testi lunghi su qualsiasi argomento e usarli per argomentare fatti e organizzare testi scritti
- mostrare la comprensione di una varietà di testi sia un maniera dettagliata che globale
- capire e produrre un linguaggio in una varietà di stili e idiomi

Esempi di struttura compositiva

Usa le tue idee, controlla gli appunti e scrivi una composizione strutturata di 330/ 400 parole.

I circhi sono obsoleti e non c'è posto per loro nel mondo dell'intrattenimento oggi.

- La crudeltà degli animali
- Clown, acrobati e intrattenitori
- Richiesta e opinioni del pubblico
- Circhi tradizionali
- Circhi moderni
- Aumento della tecnologia

Puoi usare appunti che non verranno corretti dall'esaminatore.

Ecco un esempio di saggio per il livello Masters.

The circus, great entertainment or an outdated business?

Nearly everyone has been to one at some point in their life and all children, except those afraid of clowns, seem to love them. But in this modern world of internet, computers and television, isn't the circus slowly becoming a little out of date?

One of the circus' main attractions is definitely the animals, when you visit a circus you'll be able to see all sorts of exotic animals performing all kinds of spectacular tricks. But in these modern times you'll be confronted with all sorts of moral issues about those very animals, with entire organisations criticising the circus because of the way the animals are treated there. Some circuses try to go with the public opinion and perform shows without animals, but most of the time this results in less attendances and thus, less revenue.

I personally think it is okay to use animals in the circus, though the living conditions of the animals should undergo some big improvements. Sure, if you want to see some wild animals you could just switch the telly on and watch some Animal planet, but to actually see the animals for real is an entirely different experience, which we should not withhold from future generations.

But, because of what they see on television and on the internet, these days people are less and less easily amazed. So the circus has to become more spectacular and even more wild. In other words, modern times call for modern circuses. The human part of the performance becomes almost extreme, just for the sake of entertaining the audience. The public demand for circuses might be shrinking, but what's left of it wants to enjoy some extreme shows and is probably willing to pay more money for it.

All in all the circus is still a very popular form of family entertainment and always will be, because, in my opinion, the circus is something that's simply timeless. And despite the increasing negative public opinion on circuses, I highly doubt that the demand for them will ever cease.
